Version History

Date	Author	Version	Changes made	Rationale
4/1/15	ES	1.0	Created document and updated concern logs from CCD.	For CCD report submission.

Concern Logs

Registration and Login

The client had some trouble understanding the error messages. On a failed login attempt you get "Invalid email or account not verified" which is confusing. The registration page only shows one error message even though the user has committed several errors. Also, error messages appear on the top, not next to the fields with errors.

WC_3522

- The password reminder page should provide a link to go back to the login page.

WC_3249

- The profile image editor shows the uploaded picture in full zoom, zoom it out.
- Update the placeholder in the "class of" field so that users know what to put there.
- Users should select their degree from a dropdown list, not text input.
- The order of fields in the edit profile page does not match the order of information in profile page.
- Users should only have to click once on "update password" to get their password updated.
- Users should be able to select multiple favorite categories at once.
- There is no save button when updating favorite categories, so the users do not know if the information is saved.
- There is no need for a confirmation message for update password, only a save button.
- Replace "back" with "cancel" in edit profile.
- Change the character limit for text input (too restrictive).

WC_3503

- There should be an "all threads" category that would list all threads.

WC_3503, WC_3504

- Do not show user's points in the threads; just show the name of the user's level.
- Thread and post author information should be between the text and the topic.
- The less/more button for showing thread text is buggy.

WC_3241

- Users should not be able to format text in the comments, but a comment can be formatted in edit-mode.

WC_3477

- There are no numbers in leaderboard showing which position the users are in.

WC_3246

- Search history blocks result list.

WC_3241

- A comment is double posted if user double-clicks on "comment".
