

# **We Are Trojans (WAT) Network**

## **Transition Readiness Review Team01**

**Kamonphop Srisopha  
Saloni Priya  
Eirik Skogstad  
Suleyman Erten**

**Punyawee Pakdiying  
Ameer Elkordy  
Pittawat Pamornchaisirikij  
Min Li**

# Agenda

- Operational Concept
- System Demo
- Quality Assurance
- Transition Plan

# Operational Concept

# System Purpose

## Claim:

- USC has strong connections among students and alumni (“The Trojan Family”).

## Current Situation:

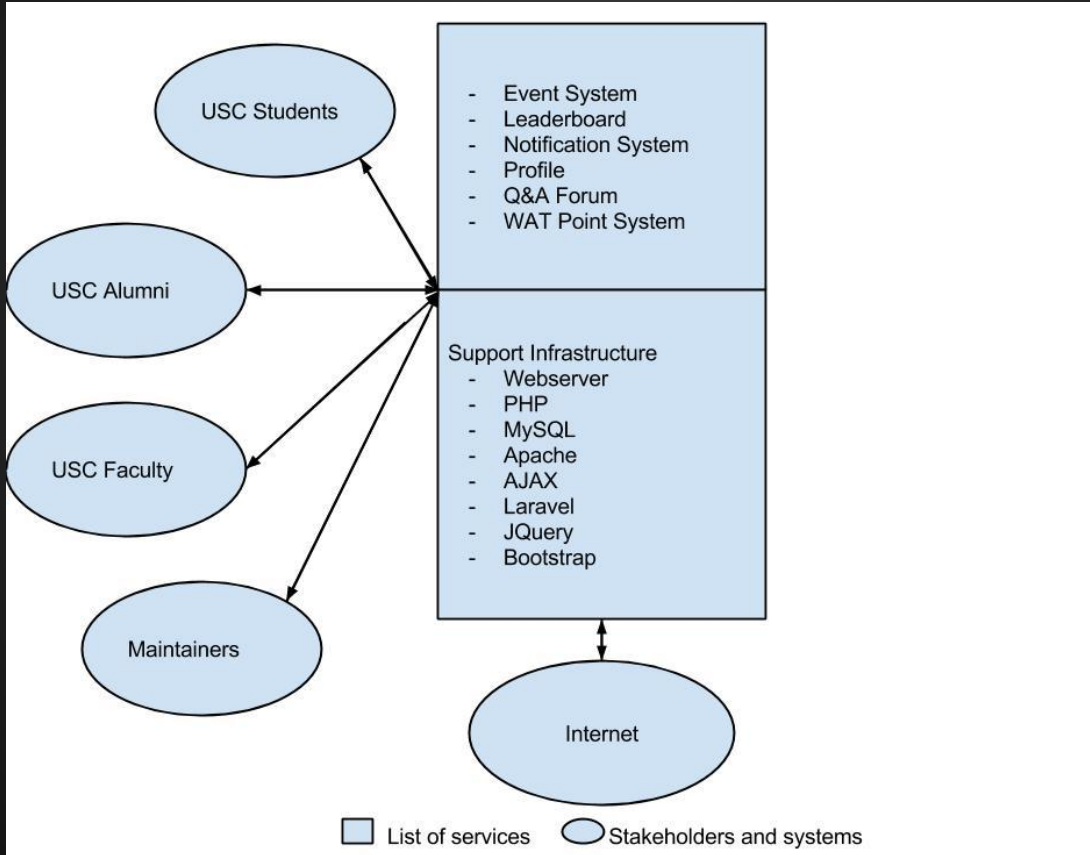

- The “Trojan Family” connection is not sufficiently manifested in the student community.

## Goals:

- Increase camaraderie between Trojans
- One-stop shop to answer any USC related queries
- Increase communications between students across schools

# System Boundary Diagram

# System Demo

# Quality Assurance

# Test Results

Number of test cases : 48	
Passed	30
Failed	4
N/A	14
**The N/A result is the those which is not implemented	

# Failed Test Cases

Test Case	Reason
TC-01-03:Check creating a thread with restricted word	We can inject HTML tag to the thread topic.
TC-02-03:Check editing a thread with restricted word	We can inject HTML tag to the thread topic
TC-06-01:Check deleting a post by a user with permission	The user WAT point is not remove if the deleted post has point.
TC-17-03:Check creating an event with missing required field.	The error shown right now is just an alert message

# How to handle the failed test cases

The HTML injection problem

- we have handled this problem before as you can see in the creating/editing post functionalities.

The user points are not update when his/her post is deleted

- we have to implement called the update point on this event.

The error message is not show properly

- This happen because we have tight schedule and the functionalities is not have high priority, so we will complete it in the next few days.

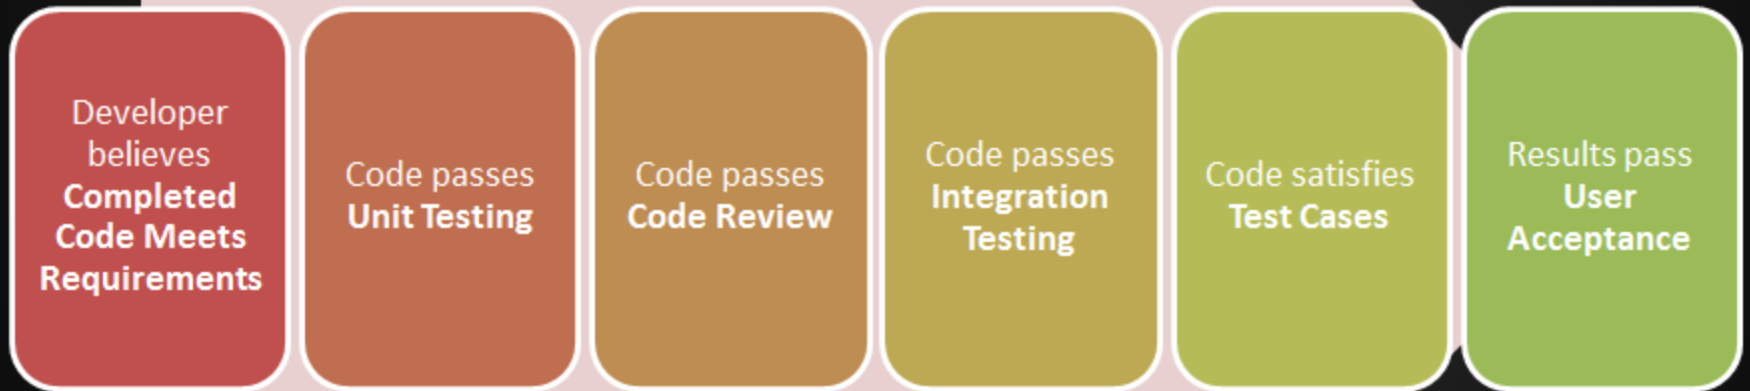

# Discarded Test Cases

TC13: Redeem an item or gift card	Our clients agreed that we can remove this functionality
TC14: Edit an item or a gift card	Our clients agreed that we can remove this functionality
TC15: Add an item or a gift card	Our clients agreed that we can remove this functionality
TC16: Delete an item or a gift card	Our clients agreed that we can remove this functionality

# Definition of Done

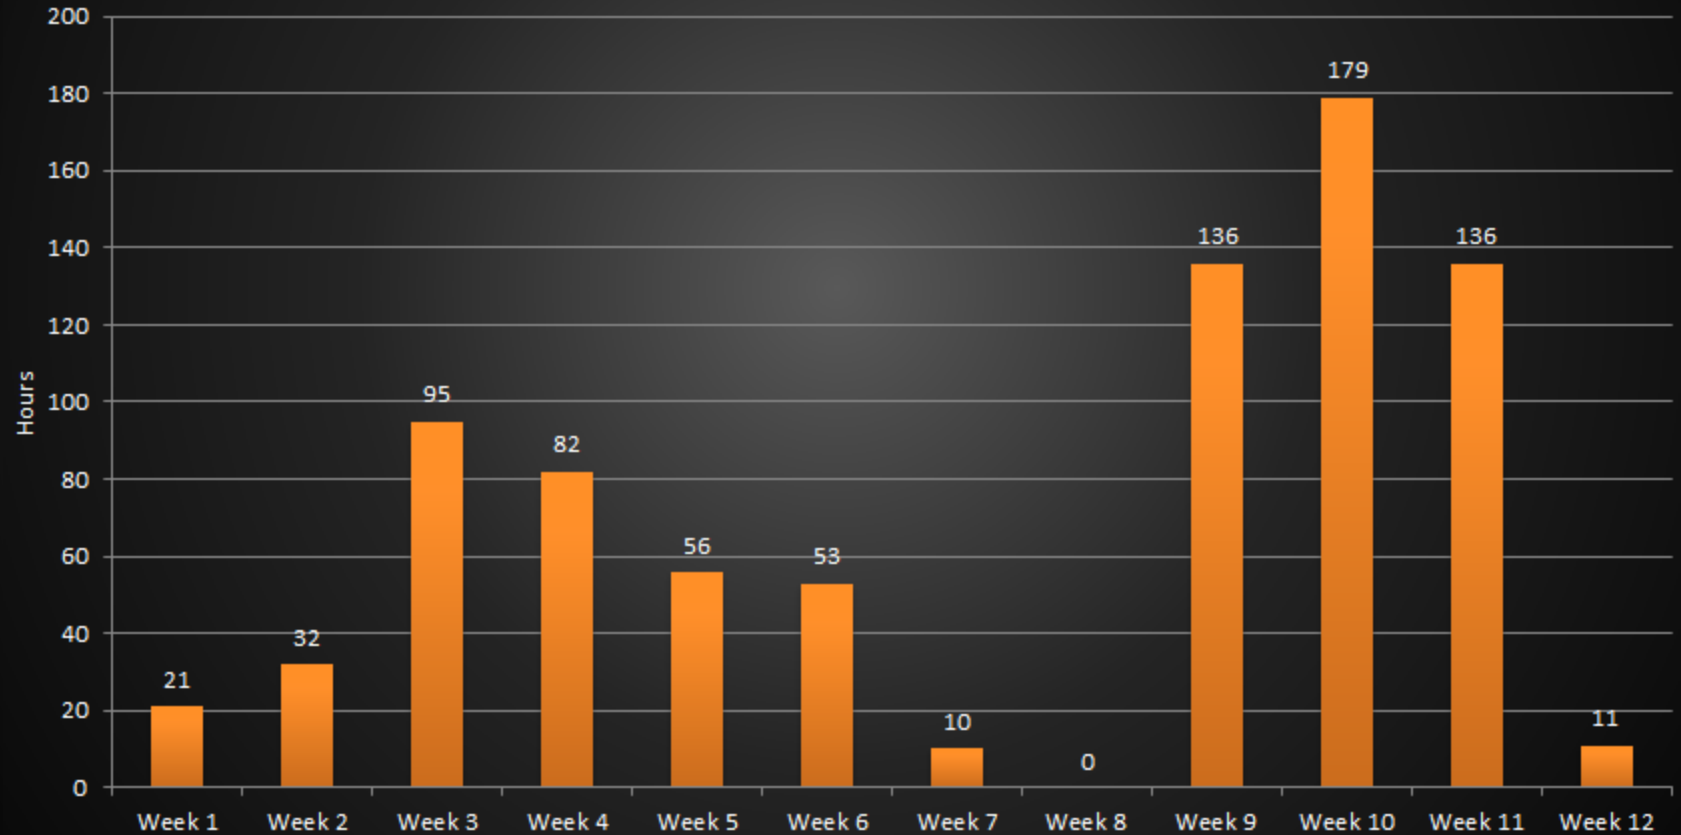

# Definition of Done

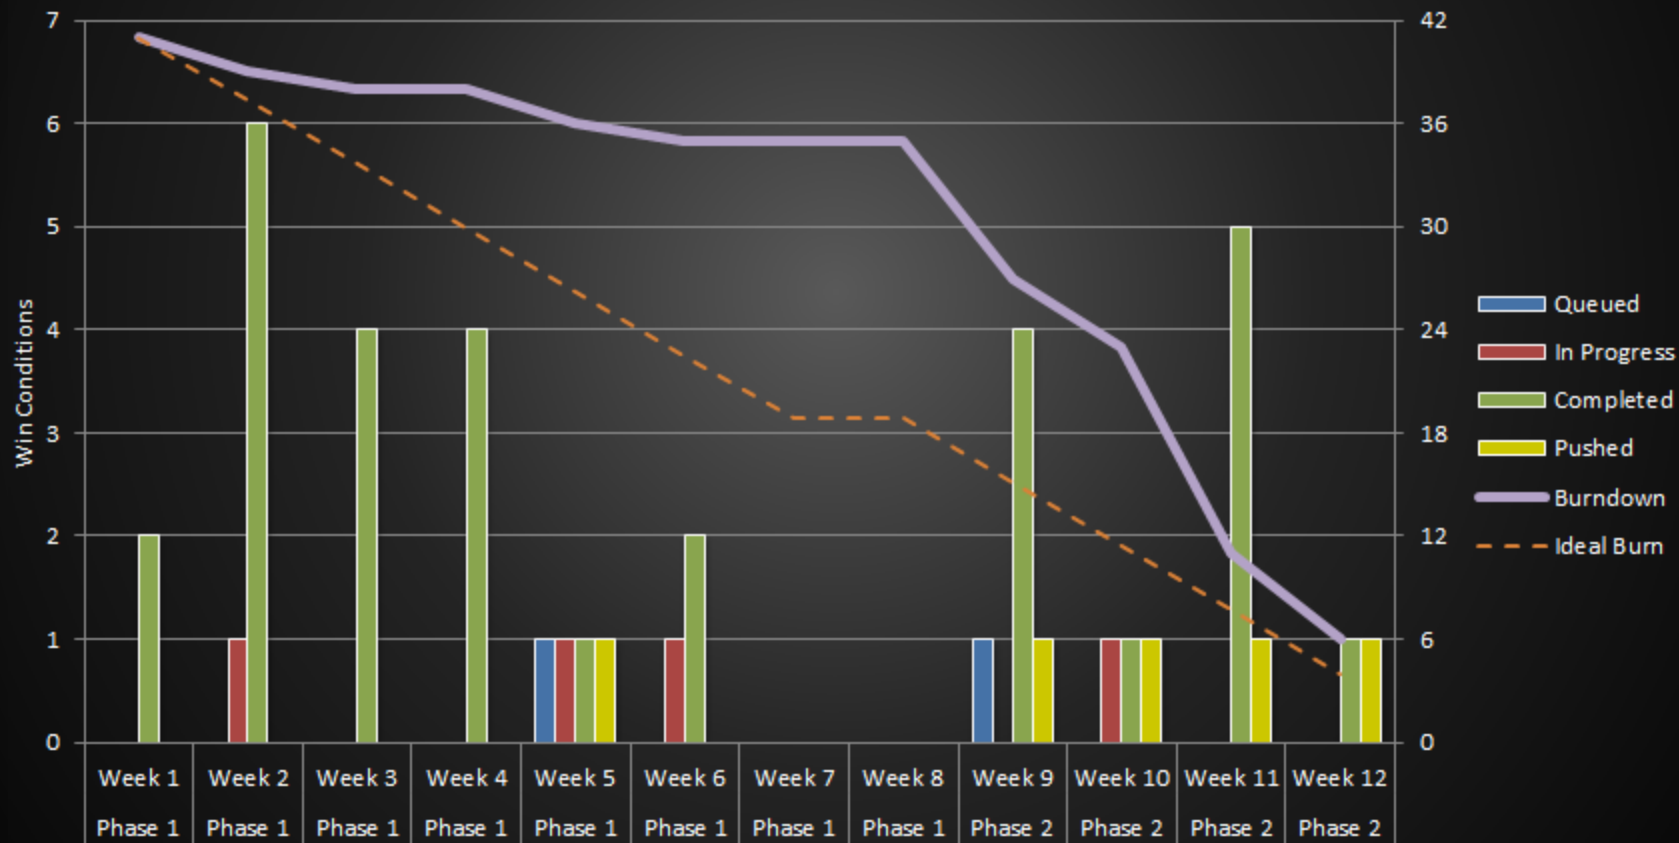

# Metrics Results

Effort

# Metrics Results

## Progress

# Technical Debt

## Solved

- Point Redemption Storefront (excluded from release)
- Test Case Coverage Acceptable
- New metrics geared towards development phases decided
- NDI (technology chosen)
- Personnel Capability (individuals training up)
- Difficult Business Concepts (prototyped)
- Hardware (development environment chosen)

## Remaining

- Client Hosting Service
- Client Domain
- Client System Maintainer

# Transition Plan

# Objectives

- Run the system on a single web server
- Client training
- Hand over source code, documentation

# Strategy

- Preparation
- Configure the web server
- Install and run the system
- Testing and evaluation

# Deliverables

- User and maintainer manual
- Project artifact documents
- Source code

# Risks

- Hosting service not yet decided
- No domain name
- (Currently no system maintainers)

# Roles

Role	Person
Developers	Kamonphop Srisopha , Min Li, Punyawee Pakdiying
Trainers	Eirik Skogstad, Saloni Priya, Suleyman Erten
Testers	Ameer Elkordy, Pittawat Pamornchaisirikij
Clients	Matthew Wong, Linda Suen

# Schedule

Date	Role	Responsibility
04/10/15	Team	Prepare a list of web hosting services that will be compatible with the system.
04/20/15	Clients	Acquire a web hosting service and a domain name.
04/20/15	Team	Have all support documents and training material ready.
04/21/15	Developers	Install all required software packages on the server. Install and run the system on the server.
04/22/15	Testers	Perform acceptance testing of the system.
04/27/15-04/30/15	Trainers, Clients	Client training.
